

TASK 04 – BUSINESS INSIGHTS REPORT (EDA)

Dataset: Marketing Campaign / Customer Personality Analysis — 2,240 customers and 29 variables.

KPI	RESULT
Final response rate	14.91%
Best acceptance rate	Campaign 4 – 7.46%
Highest avg. spend among accepters	Campaign 5 – 1,616.11
Highest purchase-volume channel	Store – 12,970 purchases
Largest spending category	Wines

Key Findings

- Campaign 4 has the highest acceptance rate, making it a strong candidate for future targeting.
- Campaign 5 has the highest average spend among accepters, indicating stronger customer value.
- Store purchases are the largest purchase channel by volume, while Web has broad customer usage.
- Wines is the dominant spending category, supporting wine-focused promotions and cross-selling.
- The final response rate is 14.91%, leaving room to improve campaign targeting and conversion.

Budget Recommendation

Prioritize Campaign 4 for testing/scaling and Campaign 5 for higher-value customer segments. Maintain strong Store support and strengthen Web engagement. Exact ROI cannot be calculated from this dataset because campaign cost and campaign-attributed revenue are absent; combine this analysis with those measures before final budget allocation.

Data Cleaning: 24 missing Income values were filled with the median; 0 duplicate rows were found. Potentially unrealistic/extreme values should be reviewed before deeper analysis.
